- English (Intermediate)

PROFILE

I am a motivated Full-Stack Developer specializing in the React and Node.js ecosystem. With over 2 years of experience, I focus on building scalable products through **type-safety** and **clean architecture**. Dedicated to the future of mobile development, I am currently deep-diving into **React Native** and **Python for AI** to deliver intelligent, cross-platform user experiences.

TECHNICAL EXPERIENCE

AgriBridge | Lead Full-Stack Developer 2025 - 2026
University Team Project

- Served as the sole developer for a multi-role agricultural platform, architecting real-time market tracking, disputes management, and a Groq-powered AI advisor for seasonal financial post-mortems.

ShopNest 2025
Full-Stack Personal Project

- Engineered a scalable apparel e-commerce platform utilizing RTK Query for efficient state management and Mongoose for flexible data modeling, featuring a full administrative suite for product and order orchestration.

Icore 2024 - 2025
Full-Stack Personal Project

- Architected a high-performance electronics marketplace using Next.js and Drizzle ORM, implementing secure OAuth (Google/GitHub) and Stripe payment integration for a seamless 2-role (Customer/Admin) experience.
